

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

"Allah's creatures in the Universe" - Lessons for life.

Reflection on the Laws of creation, which we learned in detail last week, teaches us many lessons which we believers need to realize and learn: -

First: Allah, created the universe and has made it to be of service to mankind as an honour to them. Surat AL-Isra' (17) - verses 70, Surat Ibrahim (14) - verses (32-33-34)., So did the mankind realize this honour!!

Second: ALL creatures in the universe prostrate to Allah, and follow His commands, So did the human beings prostrate to Allah who made all creatures to serve us ??!!!.

Third: It is the duty of every human being to be thankful to Allah all the time, as His blessings are countless, otherwise Allah the creator has all the power to remove these blessings, the Proof: Surat AL-Waqiah (56) - verses (63 → 73), Surat AL-Qasas (28) - verses (71 → 73)

Fourth: Allah's creatures in the universe are His soliders, whom can be sent, according to Allah's command either as a source of mercy or source of destruction. Surat 41 Fussilat (15-18)
